CONTENTS

Volume 50, Issue Nos. 1–12 (2001)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Natural neighbour galerkin methods: N. Sukumar, B. Moran, A. Y. Semenov and V. V. Belikov 1

Aspects of ductile fracture and adaptive mesh refinement in damaged elasto-plastic materials: M. Vaz Jr. and D. R. J. Owen 29

Technique of checking missed eigenvalues for eigenproblem with damping matrix: H.-J. Jung, D.-H. Kim and I.-W. Lee 55

Load stepping schemes for critical state models: D. Sheng and S. W. Sloan 67

Adaptive multigrid method using duality in plane elasticity: M. C. Dominguez and L. Ferragut 95

Stability and comparison of different linear tetrahedral formulations for nearly incompressible explicit dynamic applications: J. Bonet, H. Marriott and O. Hassan . 119

New superelements for singular derivative problems of arbitrary order: A. D. Nurse . 135

Evolutionary material translation: a tool for the automatic design of low weight, low stress structures: D. Reynolds, W. C. Christie, P. Bettess, J. McConnachie and J. W. Bull 147

Direct treatment of a max-value cost function in parametric optimization: M.-S. Kim and D.-H. Choi 169

Mid-node admissible spaces for quadratic triangular 2D finite elements with one edge curved: A. Z. I. Salem, S. A. Canann and S. Saigal 181

Multi-time-step explicit-implicit method for nonlinear structural dynamics: A. Gravouil and A. Combescure 199

Dynamic modelling of the flat 2D crack by a semi-analytic BIEM scheme: T. Tada and R. Madariaga 227

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Anbar), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

Issue No. 2

Mid-node admissible spaces for quadratic triangular arbitrarily curved 2D finite elements: A. Z. I. Salem, S. A. Canann and S. Saigal 253

A comparative study of stress update algorithms for rate-independent and rate-dependent crystal plasticity: C. Miehe and J. Schröder 273

ANN approach to sorption hysteresis within a coupled hygro-thermo-mechanical FE analysis: D. Gawin, M. Lefik and B. A. Schrefler 299

Computational mechanics based on the theory of boundary eigensolutions: A. R. Hadjesfandiari and G. F. Dargush 325

Implicit multilayer $J2$-plasticity using Prager's translation rule: F. J. Montáns 347

Fast matrix exponent for deterministic or random excitations: A. Y. T. Leung 377

An adaptive finite element approach for frictionless contact problems: G. C. Buscaglia, R. Durán, E. A. Fancello, R. A. Feijóo and C. Padra 395

A modal and damping analysis of viscoelastic Timoshenko tubes conveying fluid: Y. L. Zhang, D. G. Gorman and J. M. Reese 419

A stabilized conforming nodal integration for Galerkin Meshfree methods: J.-S. Chen, C.-T. Wu, S. Yoon and Y. You 435

Hybrid finite elements for the computation of sandwich plates: V. Manet, W.-S. Han and A. Vautrin 467

A return-mapping algorithm for plastic-damage models: 3-D and plane stress formulation: J. Lee and G. L. Fenves 487

Issue No. 3

Hierachical enrichment for bridging scales and mesh-free boundary conditions: G. J. Wagner and W. K. Liu 507

Application of fast multipole Galerkin boundary integral equation method to elastostatic crack problems in 3D: K. Yoshida, N. Nishimura and S. Kobayashi . . . 525

Locally constrained projections on grids: G. F. Carey, G. Bicken, V. Carey, C. Berger and J. Sanchez 549

A study on an estimation technique for the transverse impact of plates: C.-C. Ji, S. Ay and C. Liang 579

Field-consistent higher-order free-interface component mode synthesis: J. H. Kang and Y. Y. Kim 595

On the elastodynamic solution of frictional contact problems using variational inequalities: A. Czekanski, S. A. Meguid, N. El-Abbasi and M. H. Refaat 611

Numerical aspects of finite element simulations of residual stresses in metal matrix composites: F. Teixeira-Dias and L. F. Menezes 629

Application of the level set method to the finite element solution of two-phase flows: M. Quecedo and M. Pastor 645

A tabu-search-based algorithm for continuous multiminima problems: F. Franzè and N. Speciale 665

Shell element formulation of multi-step inverse analysis for axisymmetric deep drawing process: C. Lee and J. Cao 681

MITC finite elements for laminated composite plates: G. Alfano, F. Auricchio, L. Rosati and E. Sacco 707

Extension of the node-to-segment contact element for surface-expansion-dependent contact laws: S. Stupkiewicz 739

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 12 . . . 760

Issue No. 4

Non-linear spatial Timoshenko beam element with curvature interpolation: M. Schulz and F. C. Filippou 761

On curvature element-size control in metric surface mesh generation: C. K. Lee . . . 787

Boundary element method and internal electrodes in electrical impedance tomography: M. Tarvainen, M. Vauhkonen, T. Savolainen and J. P. Kaipio 809

ANM for stationary Navier–Stokes equations and with Petrov–Galerkin formulation: J. M. Cadou, M. Potier-Ferry, B. Cochelin and N. Damil 825

An efficient hybrid algorithm for the optimization of problems with several local minima: P. Alotto and M. A. Nervi 847

A new three-point approximation approach for design optimization problems: X. Guo, K. Yamazaki and G. D. Cheng 869

Elimination of spurious static modes in meshes of hybrid compatible triangular and tetrahedral finite elements: O. J. B. Almeida Pereira and J. P. Moitinho de Almeida . 885

An improved 'assumed enhanced displacement gradient' ring-element for finite deformation axisymmetric and torsional problems: C. C. Celigoj 899

On the analytical closed-form solution of high-order kinematic models in laminated beam theory: I. Sheinman 919

A point interpolation method for two-dimensional solids: G. R. Liu and Y. T. Gu . . . 937

On the modelling of smooth contact surfaces using cubic splines: N. El-Abbasi, S. A. Meguid and A. Czekanski 953

Analytical solutions of plane structures using *Mathematica*: R. Picón 969

Arbitrary discontinuities in finite elements: T. Belytschko, N. Moës, S. Usui and C. Parimi 993

Issue No. 5

ANNOUNCEMENT 1015

Finite element analysis of membrane wrinkling: K. Lu, M. Accorsi and J. Leonard . . 1017

Free vibration analysis of a Timoshenko beam carrying multiple spring-mass systems by using the numerical assembly technique: J.-S. Wu and D.-W. Chen 1039

Streamline strip element method for analysis of the three-dimensional stresses and deformations of strip rolling: L. Hong-Min, Z. Zhen-Zhong and P. Yan 1059

Incomplete factorization-based preconditionings for solving the Helmholtz equation: M. Magolu Monga Made 1077

Extension of the method of auxiliary mapping for three-dimensional elliptic boundary value problems: S.-J. Lee, H.-S. Oh and J.-H. Yun 1103

A parallel frontal solver for finite element applications: J. A. Scott 1131

Kinematical shakedown analysis with temperature-dependent yield stress: A.-M. Yan and H. Nguyen-Dang 1145

Numerical simulation of two-phase flow in pipes using Godunov method: V. Guinot . 1169

Finite element implementation of non-linear elastoplastic constitutive laws using local and global explicit algorithms with automatic error control: L. X. Luccioni, J. M. Pestana and R. L. Taylor 1191

Integration algorithm for J_2 elastoplasticity under arbitrary mixed stress-strain control: M. Ritto-Corrêa and D. Camotim 1213

Dynamic inflation of non-linear elastic and viscoelastic rubber-like membranes: E. Verron, G. Marckmann and B. Peseux 1233

Numerical solution to a sideways parabolic equation: D. N. Hào, H.-J. Reinhardt and A. Schneider 1253

Issue No. 6

Embedded crack model: I. Basic formulation: M. Jirásek and T. Zimmermann 1269

Embedded crack model: II. Combination with smeared cracks: M. Jirásek and T. Zimmermann 1291

Sensitivity analysis of frame structures (virtual distortion method approach): J. T. Putresza and P. Kolakowski 1307

Automatic mesh refinement in limit analysis: E. Christiansen and O. S. Pedersen . . 1331

An adaptive boundary-element approach for 3D transient free surface cavity flow, as applied to polymer processing: R. E. Khayat, C. Plaskos and D. Genouvrier 1347

A finite element displacement formulation for gradient elastoplasticity: A. Zervos, P. Papanastasiou and I. Vardoulakis 1369

Recovery of an arbitrary edge on an existing surface mesh using local mesh modifications: B. K. Karamete, R. V. Garimella and M. S. Shephard 1389

Solving initial value problems by differential quadrature method – Part 1: first order equations: T. C. Fung 1411

Solving initial value problems by differential quadrature method – Part 2: second- and higher-order equations: T. C. Fung 1429

General boundary elements solution for ageing viscoelastic structures: B. Sensale, P. W. Partridge and G. J. Creus 1455

Finite element approximation of piezoelectric plates: F. Auricchio, P. Bisegna and C. Lovadina 1469

Multiscale analytical sensitivity analysis for composite materials: J. Fish and A. Ghouali 1501

ANNOUNCEMENT 1521

Issue No. 7

FETI-DP: A dual–primal unified FETI method—part I: A faster alternative to the two-level FETI method: C. Farhat, M. Lesoinne, P. LeTallec, K. Pierson and D. Rixen 1523

A non-linear inverse vibration problem of estimating the time-dependent stiffness coefficients by conjugate gradient method: C.-H. Huang 1545

Non-isothermal '2-D flow/3-D thermal' developments encompassing process modelling of composites: flow/thermal/cure formulations and validations: N. D. Ngo and K. K. Tamma 1559

Fast exact linear and non-linear structural reanalysis and the Sherman-Morrison-Woodbury formulas: M. A. Akgün, J. H. Garcelon and R. T. Haftka 1587

A robust dual algorithm for topology design of structures in discrete variables: C. S. Jog 1607

A theory of development and design of generalized integration operators for computational structural dynamics: K. K. Tamma, X. Zhou and D. Sha 1619

A finite difference scheme for solving a three-dimensional heat transport equation in a thin film with microscale thickness: W. Dai and R. Nassar 1665

Variational Delaunay approach to the generation of tetrahedral finite element meshes: P. Krysl and M. Ortiz 1681

Finite element interface models for the delamination analysis of laminated composites: mechanical and computational issues: G. Alfano and M. A. Crisfield 1701

Extraction of boundary representation from surface triangulations: P. Krysl and M. Ortiz 1737

Modelling of elastic continua using a grillage of structural elements based on discrete element concepts: D. V. Griffiths and G. G. W. Mustoe 1759

Issue No. 8

A generalized orthotropic hyperelastic material model with application to incompressible shells: M. Itskov 1777

Energy and momentum conserving elastodynamics of a non-linear brick-type mixed finite shell element: C. Miehe and J. Schröder 1801

A parallel computational method in steady power-law creep: I. M. Klebanov and A. N. Davydov 1825

A generalized recursive formulation for constrained flexible multibody dynamics: D. S. Bae, J. M. Han, J. H. Choi and S. M. Yang 1841

Automatic generation of transitional meshes: D. A. Field 1861

Initial strain formulation without internal cells for elastoplastic analysis by triple-reciprocity BEM: Y. Ochiai and T. Kobayashi 1877

Duct flow with a transverse magnetic field at high Hartmann numbers: K. E. Barrett . 1893

The generalized differential quadrature rule for fourth-order differential equations: T. Y. Wu and G. R. Liu 1907

Conservation properties of a time FE method—part II: Time-stepping schemes for non-linear elastodynamics: P. Betsch and P. Steinmann 1931

All-hexahedral mesh smoothing with a node-based measure of quality: N. A. Calvo and S. R. Idelsohn 1957

A perturbation method for stochastic meshless analysis in elastostatics: S. Rahman and B. N. Rao 1969

Kinematically admissible meshless approximation using modified weight function: M.-S. Kang and S.-K. Youn 1993

On non-linear transformations for accurate numerical evaluation of weakly singular boundary integrals: K. M. Singh and M. Tanaka 2007

Issue No. 9

Composite material design of two-dimensional structures using the homogenization design method: D. Fujii, B. C. Chen and N. Kikuchi 2031

Edge-based finite element techniques for non-linear solid mechanics problems: A. L. G. A. Coutinho, M. A. D. Martins, J. L. D. Alves, L. Landau and A. Moraes . . 2053

A stabilized finite element formulation for the transonic small-disturbance system: T. E. Giddings, J. Fish and Z. Rusak 2069

An implicit algorithm using explicit correctors for the kinematic hardening model with multiple back stresses: J. P. G. Sawyer, C. H. Wang and R. Jones 2093

A new automatic hexahedral mesher based on cutting: G. Dhondt 2109

Improvement of semi-analytical design sensitivities of non-linear structures using equilibrium relations: E. Parente Jr. and L. E. Vaz 2127

Filters in topology optimization: B. Bourdin 2143

Time-dependent absorbing boundary conditions for elastic wave propagation: S. H. Ju and Y. M. Wang 2159

Sparse self-stress matrices for the finite element force method: E. Soyer and A. Topcu 2175

Fixed-lag smoothing and state estimation in dynamic electrical impedance tomography: P. J. Vauhkonen, M. Vauhkonen and J. P. Kaipio 2195

Optimization algorithms for physically non-linear structures: S. V. Selyugin 2211

The meshless standard and hypersingular boundary node methods—applications to error estimation and adaptivity in three-dimensional problems: M. K. Chati, G. H. Paulino and S. Mukherjee 2233

A generalized complex eigenvector method for dynamic analysis of heterogeneous viscoelastic structures: V. V. Mokeyev 2271

Issue No. 10

Woven fabric composites—part I: Predictions of homogenized elastic properties and micromechanical damage analysis: J. Choi and K. K. Tamma 2285

Woven fabric composites—part 2: Characterization of macro-crack initiation loads for global damage analysis: J. Choi and K. K. Tamma 2299

Low-Reynolds-number flow around an oscillating circular cylinder using a cell viscous boundary element method: B. Uzunoğlu, M. Tan and W. G. Price 2317

A finite volume method with a modified ENO scheme using a Hermite interpolation to solve advection–diffusion equations: A. Balaguer, C. Conde, J. A. López and V. Martinez 2339

Finite cloud method: a true meshless technique based on a fixed reproducing kernel approximation: N. R. Aluru and G. Li 2373

Novel cooling channel shapes in pressure diecasting: L. D. Clark, K. Davey and S. Hinduja 2411

Erratum: D. Sheng and S. W. Sloan 2441

Issue No. 11

Simulations of flow through fluid/porous layers by a characteristic-based method on unstructured grids: B. Zhang and Y. Zhao 2443

A lumped mass numerical model for cellular materials deformed by impact: Z. H. Tu, C. T. Lim and V. P. M. Shim 2459

Inverse design of directional solidification processes in the presence of a strong external magnetic field: R. Sampath and N. Zabaras 2489

Dispersion analysis of stabilized finite element methods for acoustic fluid interaction with Reissner-Mindlin plates: L. L. Thompson and S. Sankar 2521

Model updating by adding known masses: P. D. Cha and L. G. de Pillis 2547

Aspects of the computational testing of the mechanical properties of microheterogeneous material samples: T. I. Zohdi and P. Wriggers 2573

Issue No. 12

A new numerical algorithm for sub-optimal control of earthquake excited linear structures: M. Bakioglu and U. Aldemir 2601

The generation of hexahedral meshes for assembly geometry: survey and progress: T. J. Tautges 2617

A numerically scalable domain decomposition method for the solution of unilateral contact problems: D. Dureisseix and C. Farhat 2643

A new method for modelling cohesive cracks using finite elements: G. N. Wells and L. J. Sluys 2667

Topology synthesis of large-displacement compliant mechanisms: C. B. W. Pedersen, T. Buhl and O. Sigmund 2683

Stability analysis of cylindrical shells using refined non-conforming rectangular cylindrical shell elements: Z. Shaoyan, Y. K. Cheung and C. Wanji 2707

An improved partition of unity finite element model for diffraction problems: P. Ortiz and E. Sanchez 2727
